Knowing the camcorder

➤ Part names¹

- 1.USB jack
- 2.Start/Stop/Power/Shutter button
- 3.Busy indicator light
- 4.Speaker
- 5.Microphone
- 6.OK button
- 7.Up/Wi-Fi button
- 8.Mode button
- 9.Menu button
- 10.Down button
- 11.LCD screen
- 12.Lens
- 13.TF card slot

¹ All images and illustrations given in this manual are for explanation purpose and may differ slightly from the actual product.

14.HDMI jack

15.Reset

16.Bracket

17.Tripod slot

18.Water resistant case

Part 16 and part 18 are protectors for the camcorder, it not only can keep your sportive clean, but also can protect your sport camcorder from some damages, and because of the tripod slot , it's convenient fix to a bike or a helmet, the detail refers to the following pages.

➤ Installing mounts²

In order to use the camcorder more convenient in outdoor sports or in under water situations, We have provide some mounts to fix the camcorder to solve it .

There are two kinds of mounts packaged in this the camcorder.

a

b

By installing these mounts, the camcorder can fix to bikes or helmets.
The operating steps as follow:

Fix the sportive camcorder to a bike

1. Find the water resistant case or the bracket, and put the camcorder

² In this paragraph, all camcorders in images are used the water resistant, and the bracket also can make it in the same way.

into it, then lock it .

2. Find the mount a , open the round of the mount (1) , and put the rubber pad(2) into it, then use the screw to fix them roughly.
3. Fix the metal screw of the mount to the tripod slot of the camcorder respectively.
4. Fix them to handlebars of the bike, and adjust the screws to make the camcorder more steady and convenient.

Fix the sportive camcorder to a helmet

1. The same way to wear the water resistant case for your camcorder.
2. Find the mount b , then you can fix the metal screw of the mount to the tripod slot of the camcorder.

3:After fixing the camcorder to the mount , you need to choose which way to fix them to the helmet.

a: Using a strap. Insert a strap into the two ends of the mount, adjust length according to helmet's size, and then you can use the strap fix to your helmet.

b :using a sticker Use the side of sticker paste to the mount, and the other side paste to your helmet.

NOTES:

- It will record no sounds when using the water resistant case .
- when used underwater, water resistant case with spray or drops is a normal phenomenon.
- Recording at once after using it in water may cause the recording files is blurry.

Preparing before using

➤ Charging the camcorder

The camcorder has an internal lithium-ion battery, please charge it for the first time use.

1. Turn off the camcorder.
2. Connect the USB cable to the power adapter, and then plug the power adapter into a power outlet.
3. Open the USB cover at the side of the camcorder, and find the USB jack in it .
4. Connect the other side of the USB cable to the USB jack of the camcorder .

Connections

➤ Connecting to a computer

There are two ways to download files from the camcorder's internal memory or memory card to a computer:

- By inserting the memory card into a card reader
- By connecting the camera to a computer using the supplied USB cable.

Using a Card Reader

1: Eject the memory card from the camcorder and insert it into a card reader.

2: connect the card reader to the computer.

3: Open [My Computer] or [Windows Explorer] and double-click the removable disk icon that represents the memory card.

3: Copy images from the card into a directory of your choice on the computer's hard disk.

Using a USB Cable

1: Connect the supplied USB cable to the computer's USB port and turn the camcorder on.

- 2: After the camcorder turning on, the screen will turn bright, and you will see a USB icon on the screen.
- 3: Open [My Computer] or [Windows Explorer]. A "Removable Disk" appears in the drive list. Double-click the "Removable Disk" icon to view its contents. Files stored on the camera are located in the folder named "DCIM".
- 4: Copy the files that you want to your computer.

➤ **Connecting the HDTV**

1. Connect the camcorder to HDTV by attached HDMI-cable.
2. Turn on HDTV and switch to HDMI-mode.
3. Turn on the camcorder.
4. After connecting correctly, the screen of the camcorder will darken, but we can see the objects shows on the screen of the HDTV, moreover, we can still use it to record videos, images, and set menus, just the screen is the HDTV.

➤ **Wi-Fi Connecting**

You can use your cellphone/tablet PC in Android or IOS system to control the camcorder through the Wi-Fi function.

Installing

1. Make sure you have installed the software "iSmart DV" in your cellphone or tablet PC (Androids can download from the Play Store , while the IOS downloads from the APP Store).
2. Turn the camcorder on and exit the video recording, then press the **UP** button to enter the Wi-Fi connecting mode ,and it shows the "Waiting For Wi-Fi Connecting" on the screen.
2. Open the Wi-Fi named "ISHARE_000****" (****is the sequence of the camcorder) " and connect it in your cellphone/ tablet PC. The primary password is "12345678"
3. After building up the Wi-Fi connection successfully, a icon" Wi-Fi Connection Ready...!" is shown on the screen of the camcorder.
4. Run the "i Smart DV" . So you can see the objects viewing by your camcorder is shown on your cellphone or tablet PC. And at this time you can control it by your cellphone or tablet PC.

Start :

- Touch the two icon   to switch between video mode and capture mode.
- Touch the icon  to start recording a movie clip, touch it again to stop recording. And touch the icon  to take a still photo.

Settings:

(It may be different depending on your software version)

Touch the icon you want to set, including self-timer, resolution, white balance.

- Self-timer. set a delay from the time the shutter icon is touched to the time the image is shot. [Off]/[2s]/[10s]
 - Photo resolution: [5M]/[3M]/[2M]/[1M]/[VGA]
 - Video resolution: [FHD 1080p@30fps]/[HD 720P@60fps]/[HD 720P@30fps]
 - White balance: Auto/Daylight/Cloudy/Fluorescent/Incandescent
- And we can touch the icon  to set more options. Continues shooting, white balance, frequency, format camera, and version informations.
- Continues shooting: it will take several photos per shoot as you set. [Off]/[3 photos]/[5 photos] /[10 photos]

5. During using, neigh press the **UP** button of the camcorder nor exit the “iSmart DV” in your cellphone/tablet PC can exit the connections.

➤ **Using the PC camera function**

1. Turn on the camcorder. .
2. Set the USB option in setup menu to [UVCH264] or [UVC MJPG] .
3. Connect the camcorder to a computer by the USB cable. Then there is an icon “PCCAM” will shown on the screen of the camcorder.
4. Open [my computer] and open the file named " USB video tool", then you can use it as a PC camera.

After setting the USB, please do not turn off the camcorder, or you will not make it .

Installing software

➤ **Installing the Software**

The bundled software CD has the drivers and software that come with

video camera. Insert the CD into your CD-ROM drive and open it, then double click the “start”, so it will pop up an installation MENU as below:

- Install MAGIX Video easy SE- Install software for editing video clips.
 - Install MAGIX Photo Manager - Install software for editing pictures.
- Click the items and follow the on-screen instructions to install the software.

Notes:

1.Open MAGIX Video easy SE or MAGIX Photo Manager , you have to register the software at first, then use program without any time limit.

2. Don't forget to choose the Quick Time Player during installing MAGIX Video easy SE.
3. MAGIX Video easy SE and MAGIX Photo Manager 10 are only supported in Windows XP, Vista, Windows 7, Windows 8 platforms.
